

Approved for use through 03/31/2007. OMB 0651-0031
U.S. Patent and Trademark Office; U.S. DEPARTMENT OF COMMERCE
Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

**PETITION FOR REVIVAL OF AN APPLICATION FOR PATENT
ABANDONED UNINTENTIONALLY UNDER 37 CFR 1.137(b)**

Docket Number (Optional)

666112.0132

(80408.0012)

First named inventor: SWT A. MOSKOWITZ et al.

Application No.: 09/657,181

Art Unit: 2857

Filed: September 7, 2000

Examiner: Carol SW Tsa

Title: Method and Device for Monitoring and
Analyzing Signals

Attention: Office of Petitions
Mail Stop Petition
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450
FAX (571) 273-8300

NOTE: If information or assistance is needed in completing this form, please contact Petitions Information at (571) 272-3282.

The above-identified application became abandoned for failure to file a timely and proper reply to a notice or action by the United States Patent and Trademark Office. The date of abandonment is the day after the expiration date of the period set for reply in the office notice or action plus an extensions of time actually obtained.

APPLICANT HEREBY PETITIONS FOR REVIVAL OF THIS APPLICATION

NOTE: A grantable petition requires the following items:

- (1) Petition fee;
- (2) Reply and/or issue fee;
- (3) Terminal disclaimer with disclaimer fee - required for all utility and plant applications filed before June 8, 1995; and for all design applications; and
- (4) Statement that the entire delay was unintentional.

1. Petition fee

☒ Small entity-fee \$ 750⁰⁰~~xx~~ (37 CFR 1.17(m)). Applicant claims small entity status. See 37 CFR 1.27.

☐ Other than small entity - fee \$ _____ (37 CFR 1.17(m))

2. Reply and/or fee

A. The reply and/or fee to the above-noted Office action in the form of Response to Non-Final Office Action (identify type of reply):

☒ has been filed previously on November 22, 2004
☐ is enclosed herewith.

B. The issue fee and publication fee (if applicable) of \$ _____

☐ has been paid previously on _____
☐ is enclosed herewith.

[Page 1 of 2]

This collection of information is required by 37 CFR 1.137(b). The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.11 and 1.14. This collection is estimated to take 1.0 hour to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Mail Stop Petition, Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

3. Terminal disclaimer with disclaimer fee

☒ Since this utility/plant application was filed on or after June 8, 1995, no terminal disclaimer is required.

☐ A terminal disclaimer (and disclaimer fee (37 CFR 1.20(d)) of \$ _____ for a small entity or \$ _____ for other than a small entity) disclaiming the required period of time is enclosed herewith (see PTO/SB/63).

4. STATEMENT: The entire delay in filing the required reply from the due date for the required reply until the filing of a grantable petition under 37 CFR 1.137(b) was unintentional. [NOTE: The United States Patent and Trademark Office may require additional information if there is a question as to whether either the abandonment or the delay in filing a petition under 37 CFR 1.137(b) was unintentional (MPEP 711.03(c), subsections (III)(C) and (D)).]

WARNING:

Petitioner/applicant is cautioned to avoid submitting personal information in documents filed in a patent application that may contribute to identity theft. Personal information such as social security numbers, bank account numbers, or credit card numbers (other than a check or credit card authorization form PTO-2038 submitted for payment purposes) is never required by the USPTO to support a petition or an application. If this type of personal information is included in documents submitted to the USPTO, petitioners/applicants should consider redacting such personal information from the documents before submitting them to the USPTO. Petitioner/applicant is advised that the record of a patent application is available to the public after publication of the application (unless a non-publication request in compliance with 37 CFR 1.213(a) is made in the application) or issuance of a patent. Furthermore, the record from an abandoned application may also be available to the public if the application is referenced in a published application or an issued patent (see 37 CFR 1.14). Checks and credit card authorization forms PTO-2038 submitted for payment purposes are not retained in the application file and therefore are not publicly available.

**REQUEST FOR EXTENSION OF TIME
AND RESPONSE TO OFFICE ACTION**

Sir:

This application is U.S. Patent Application No. 09/657,181, filed September 7, 2000.
In response to the non-final Office Action, dated July 22, 2004, Applicants submit the
following response:

Request for Extension of Time

Applicants hereby request a one (1) month extension of time to reply to the Office
Action dated July 22, 2004. The time for response is therefore extended up to and
including November 22, 2004. A credit card payment form in the amount of \$55.00 to cover
the required fee is enclosed with this filing.

REMARKS/ARGUMENTS

Rejections under Double Patenting

§ 101 Rejections based on a judicially created doctrine of provisional obviousness-type double-patenting

Applicants respectfully traverse the Examiner's assertion that the instant invention's Claim 1 (and all claims depending therefrom) is not patently distinct from co-pending Application No. 09/671,739 Claim 1. While Applicants may disagree with the premise of the rejection, if Claim 1 of US Patent Application No. 09/671,739 is issued as a patent, Applicants will file a terminal disclaimer at that time.

Rejections under 35 U.S.C. § 112 first paragraph must assess whether there is written description to support the claim language

Claims 1-25

Applicants respectfully traverse the rejection of claims 1-25 under 35 USC §. 112 first paragraph.

See MPEP § 2163(II)(A)(3)(b), at 2100-165 ("To comply with the written description requirement of 35 USC § 112, para. 1, ... each **claim limitation** must be expressly, implicitly, or inherently supported in the originally filed disclosure") (emphasis added); see also *Martin v. Mayer*, 823 F.2d 500, 505 (Fed. Cir. 1987) ("[The written description analysis] is 'not a question of whether one skilled in the art might be able to construct the patentee's device from the teachings of the disclosure. ... Rather, it is a question whether the application necessarily discloses that particular device.'" (quoting *Jepson v. Coleman*, 314 F.2d 533, 536, 136 U.S.P.Q. (BNA) 647, 649-50 (CCPA 1963)). In this case, the claim limitation at issue is "query signal". Thus, "query signal" must be the focus of a "written description" analysis.

The Federal Circuit has found that the purpose of the requirement is to protect against over-reaching claims that may be added by amendment after the filing date:

Satisfaction of the description requirement insures that subject matter presented in the for of a claim subsequent to the filing date of the application was sufficiently disclosed at the time of filing so that the prima facie date of invention can be fairly held to be the filing date of the application.

Vas-Cath Inc. V. Mahurkar, 935 F.2d 1555 (Fed. Cir. 1991) (quoting *In re Smith and Hubin*, 481 F.2d 914 (CCPA 1973) (citations omitted)). In this case, there can be no doubt

that the claim language at issue, "query signal", was present in the application as originally filed on September 7, 2000. Accordingly, there can be no doubt that the policy behind the written description requirement is met.

It is well settled that "to satisfy the written description requirement, the disclosure as originally filed does not have to provide *in haec verba* support for the claimed subject matter at issue." *Purdue Pharma L.P. v. Faulding Inc.*, 230 F.3d 1320, 1323 (Fed. Cir. 2000) (citing *Fujikawa v. Wattanasin*, 93 F.3d 1559, 1570 (Fed. Cir. 1996)) (emphasis added).

In this application, however, there is *in haec verba* support. Thus, the rejection should be withdrawn.

Rejections under 35 U.S.C. § 112 second paragraph

Claims 1-25

Applicants respectfully traverse the rejection of claims 1-25, 35 USC §. 112 second paragraph.

Contrary to the Examiner's assertion that "query signal" is indefinite, the term is widely understood in the art of databases. One of the most widely deployed database technologies is "SQL" meaning "structured query language". Applicants affirm that the term query signal is not repugnant to the meaning of the term "query" alone. A "query signal" as disclosed refers to the "signal" being monitored or analyzed. Indeed, Claim 1 makes this very clear when it recites [emphasis added]: "receiving at least one query signal **to be analyzed.**" In other words, a "query signal" is a signal that is being queried. Because this is made clear in at least the Summary and in the original claims, the Applicants request the rejection to be withdrawn.

MPEP § 608.01(a) "The description should be as short and specific as is necessary to describe the invention adequately and accurately. Where elements or groups of elements, compounds, and processes, which are conventional and generally widely known in the field of the invention described, and their exact nature or type is not necessary for an understanding and use of the invention by a person skilled in the art, they should not be described in detail."

With regards to Claim 24, the Specification teaches that the "criteria" is used by the processor in creating "an abstract", and, so, Claim 24 is merely referencing that the same criteria is shared between the "processors".

Rejections under 35 U.S.C. § 102

§ 102 Rejections based on Rhoads

Claims 1, 4-6, 8, 12, 13, and 16-20 stand rejected as allegedly anticipated by U.S. Patent No. 6,430,302 issued to Rhoads (hereafter Rhoads). (See page 4 of the Office Action).

Claim 1, 8, and 13 (and all claims depending therefrom)

In order for a reference to anticipate a claim, the reference must disclose each and every limitation of the claimed invention, either expressly or inherently, such that a person of ordinary skill in the art could practice the invention without undue experimentation. See *Atlas Powder Co. v. Ireco Inc.*, 190 F.3d 1342, 1347, 51 USPQ2d 1943, 1947 (Fed. Cir. 1999); *In re Paulsen*, 30 F.3d 1475, 1479, 31 USPQ2d 1671, 1673 (Fed. Cir. 1994). Independent Claim 1 recites, *inter alia*, [emphasis added]: "A method for monitoring and analyzing at least one signal comprising: **receiving at least one reference signal to be monitored; creating an abstract of said at least one reference signal; storing the abstract of said at least one reference signal in a reference database;** receiving at least one query signal to be analyzed; **creating an abstract of said at least one query signal; comparing the abstract of said at least one query signal to the abstract of said at least one reference signal to determine if the abstract of said at least one query signal matches the abstract of said at least one reference signal.**" The 102 rejection based on Rhoads is improper for at least the reason that Rhoads fails to disclose "creating an abstract of said reference signal" and "storing the abstract of said at least one reference signal in a reference database."

In fact, Rhoads' description that, "[t]he N-bit identification word refers to a unique identification binary value ... which is the identification code placed onto the original signal ... " *Rhoads*, at col. 4, ll. 33-38 indicates *independence* from the original signal, *not* an abstract created *from* a reference signal, contrary to the Examiner's assertion. Rhoads' "N-bit identification code word" is, thus, allegedly an independent "invisible signature" encoded in such a manner as to yield a "distributable signal" *not* an abstract to be stored in a reference database, *Rhoads* at col. 38, ll. 33-38: "[b]riefly and for the sake of clarity, the phrases and terms 'signatures,' 'invisible signatures,' and 'signature codes' have been and will continue to be used to refer to the general techniques of this invention and often refer specifically to *the composite embedded code signal* as defined early on in this disclosure." Being independent from the "reference signal" Rhoads' "embedded code" cannot be equivalent with the Applicants' "abstract". Rhoads teaches away from Applicants' claim limitation: "creating an abstract of said reference signal" and "storing the abstract of said at least one reference signal in a reference database."

Second, that this identification code is encoded *into* the original signal makes it inaccessible without the original signal, *Rhoads* at col. 5 ll. 21-28, "... [t]he N-bit identification word is encoded onto the original signal by having each of the m bit values multiply their corresponding individual embedded code signals, the resultant being accumulated in the composite signal ... the resultant composite signal added to the original to become the distributable signal." With Rhoads there is no "query signal" from which an abstract is created. Thus, Rhoads does not teach the claim limitation: "receiving at least one query signal to be analyzed; creating an abstract of said at least one query signal; comparing the abstract of said at least one query signal to the abstract of said at least one reference signal to determine if the abstract of said at least one query signal matches the

abstract of said at least one reference signal." Instead, the original signal is differenced with a suspect signal (more on this aspect below). This approach teaches away from creating abstracts based on a reference signal, storing said abstracts in a database, and comparing query signal abstracts with the reference signal abstracts in the database, contrary to the assertions of the Examiner.

Third, Rhoads' description of how his "invisible signatures" are decoded teaches away from the Applicants' invention. Rhoads allegedly relies on the embedded code signal[s] for identification, not comparisons of "reference signal abstracts" with "query signal abstracts" – no abstract is disclosed. At the very least, Rhoads' original signal[s] inherently *lack* the encoded invisible signature and, thus, cannot equate to the abstracts of the Applicants. In fact, Rhoads differences a "suspect signal" with the "original signal" to attempt recovery of the N-bit identification word. Why use abstracts for identification purposes if invisible signatures must first be *extracted* from the suspect signal based on a comparison with the original signal? *Rhoads* at col. 5 ll. 57-60: "[o]nce the suspect signal has been sample-spacing matched and registered to the original, the signal levels of the suspect signal should be matched in an rms sense to the signal level of the original. This can be done via a search on the parameters of offset, amplification, and gamma being optimized by using the minimum of the mean squared error between the two signals as a function of the three parameters." Additionally, *Rhoads* at col. 5 ll. 66 – col. 6 ll. 10:

The newly matched pair then has the original signal subtracted from the normalized suspect signal to produce a difference signal. The difference signal is then cross-correlated with each of the N individual embedded code signals and the peak cross-correlation value recorded. The first four bit code ('0101') is used as a calibrator both on the mean values of the

zero value and the one value, and on further registration of the two signals if a finer signal to noise ratio is desired (i.e., the optimal separation of the 0101 signal will indicate an optimal registration of the two signals and will also indicate the probable existence of the N-bit identification signal being present.)

If the original and suspect signals are compared to yield a difference signal which is then used to determine *if* the "N-bit identification signal [is] present", including use of a "0101" "calibrator", Rhoads teaches away from the Applicants' claim limitations for creation of an "abstract" from a "reference signal" for later comparison with the "abstract" of a "query signal". Rhoads discloses further examples of his decoding scheme at col. 17 ll. 35 – col. 18 ll. 5. Rhoads' approach may make recovery of the N-bit identification word impossible (more on this additional point below).

Fourth, the identification word of Rhoads is not an "abstract" but "noise," *Rhoads* at col. 17 ll. 40. Rhoads discloses several times that his N-bit identification word is akin to "noise." See *Rhoads* at col. 3 ll. 50-53; col. 15 ll. 54-57; col. 17 ll. 14-16; col. 17 ll. 61-64; col. 20 ll. 38-42; and, the lengthy description provided at col. 23 ll. 55 – col. 24 ll. 50. Because this noise becomes inherent to the original signal even comparisons with the suspect signal for decoding purposes may result in "erasing" the "embedded code." If such erasure occurs how can it be compared with a query signal abstract? Rhoads discloses the problem, "[a]t step 9, FIG. 3, if we were to subtract the 'original' with its embedded code, we would obviously be 'erasing' the code as well since the code is an integral part of the original. Fortunately, remedies do exist and identifications can still be made. However, it will

be a challenge to artisans who refine this embodiment to have the signal to noise ratio of the identification process in the pre-exposed negative case approach the signal to noise ratio of the case where the un-encoded original exists," *Rhoads* at col. 13 ll. 20-28. An "abstract", as disclosed by the Applicants, is not noise, and cannot be "erased."

Because *Rhoads* fails to disclose (1) "creating an abstract of said at least one reference signal", (2) "storing the abstract of said at least one reference signal in a reference database", and (3) "comparing the abstract of said at least one query signal to the abstract of said at least one reference signal to determine if the abstract of said at least one query signal matches the abstract of said at least one reference signal" as required by Claim 1, the Section 102 rejection of Claim 1 must be withdrawn. Moreover, for the same reasons that Claim 1 is patentable over *Rhoads*, independent Claims 8 and 13 and the claims that depend from Claims 1, 8 and 13 also are patentable. Applicants request the Examiner withdraw the Section 102 rejections of Claims 1, 8, and 13, and all claims depending therefrom, based on *Rhoads*.

Rejections under 35 U.S.C. § 103

In order to "establish a prima facie case of obviousness, three basic criteria must be met." MPEP § 7.06.02(j). First, there must be some motivation or suggestion to modify the reference or to make the proposed combination. Second, there must be a reasonable expectation of success. "The teaching or suggestion to make the claimed combination and the reasonable expectation of success must both be found in the prior art, and not based on the applicant's disclosure." MPEP § 2142 (citing *In re Vaeck*, 947 F.2d 488, 20 USPQ2d 1438 (Fed. Cir. 1991)). Third, the combined references must teach or suggest all claim limitations.

§ 103 Rejections based on Rhoads

Claims 21 (and all claims depending therefrom)

Claim 21 has been rejected under 35 U.S.C. § 103(a) as being unpatentable over Rhoads. Examiner asserts that, "Rhoads discloses an electronic system for monitoring and analyzing at least one signal, comprising: a first input that receives at least one reference signal to be monitored, a processor that creates an abstract of each reference signal input to said first processor through said first input...", Office Action at 6, Applicants respectfully disagree.

It is unclear how the Examiner construes the term "multiprocessor" as this term is not part of the claim language. The Examiner's Official Notice regarding a combination of Rhoads with "multiprocessor" is also not clear to the Applicants. Applicants thus respectfully request clarification on the 103 rejections based on Rhoads and "multiprocessor."

As previously presented, Rhoads, allegedly discloses a method for embedding an N-bit identification word into an original signal. Decoding the N-bit identification word requires differencing the unencoded original signal and a suspect signal to yield a difference signal. This difference signal looks like noise and cannot be independently decoded. It is not an abstract nor is there any comparison between a reference signal abstract, stored in a reference database, with a query signal abstract as required by the claim limitations.

None of the claimed elements are disclosed by Rhoads, including: (1) "a first input that receives at least one reference signal to be monitored"; (2) "a first processor that creates an abstract of each reference signal input to said first processor through said first input"; (3) "a second input that receives at least one query signal to be analyzed, (4) "a second processor that creates an abstract of each query signal"; (5) "a reference database that stores abstracts of each at least one reference signal"; and, (6) "a comparing device that compares an abstract of said at least one query signal to the abstracts stored in the reference database to determine if the abstract of said at least one query signal matches any of the stored abstracts." Rhoads does not disclose any of the claimed elements in independent Claim 21. Applicants therefore request that Examiner withdraw the Section 103 rejections of Claims 21 (and all claims that depend therefrom).

Comments concerning Allowable Subject Matter

Examiner explains that: "Claims 2, 3, 7, 9-11, 14, 15, and 25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims" Office Action at Page 7.

Applicants maintain that the term "query signal" is common to the art of databases including the pervasive "SQL" or "Structured Query Language". This is the most common database in use today and at the time of the instant invention's filing was well-known to artisans.

MPEP 707.07(j) states: "When, during the examination of a *pro se* application it becomes apparent to the examiner that there is patentable subject matter disclosed in the application, the examiner should draft one or more claims for the applicant and indicate in his or her action that claims would be allowed if incorporated in the application by amendment." Applicants are proceeding *pro se* and request clarification on the how the cited claims can be rewritten if the term "query signal" continues to be objectionable.

Conclusion

Applicants maintain that this application is in condition for allowance, and such disposition is earnestly solicited. If the Examiner believes that an interview with Applicant, either by telephone or in person, would further prosecution of this application, we would welcome the opportunity for such an interview.

Respectfully submitted,

Sir:

Request to Proceed on Behalf of a Sole Assignee Under CFR § 3.73(b)

Blue Spike, Inc., a Florida corporation, certifies that it is the sole assignee of the entire right, title, and interest in the above-identified patent application by virtue of a chain of title from the inventors of the above-identified patent, to the current assignee as follows:

The undersigned has reviewed all of the documents in the chain of title of the patent application identified above and, to the best of the undersigned's knowledge and belief, title is in the assignee identified above. Attached herein are the following supporting documents: Verified Statement (Declaration) Claiming Small Entity Status; Original Declaration and Power of Attorney signed by Scott Moskowitz and Michael Berry; Assignment signed by Scott Moskowitz and Michael Berry; U.S. Patent & Trademark Office Notice of Recordation of Assignment Document (Recordation Date December 12, 2000, Reel/Frame 011365/0665). Blue Spike, Inc. continues to be the sole owner of all rights in the application. The undersigned (whose title is supplied below) is empowered to sign this certificate on behalf of the assignee.

I hereby declare that all statements made herein of my own knowledge are true, and that all statements made on information and belief are believed to be true; and further that these

statements are made with the knowledge that willful false statements, and the like so made, are punishable by fine or imprisonment, or both, under Section 1001, Title 18 of the United States Code, and that such willful false statements may jeopardize the validity of the application or any patent issuing thereon.

Respectfully submitted,

BLUE SPIKE, INC.

DECLARATION AND POWER OF ATTORNEY FOR PATENT APPLICATION

As the below named inventor, I hereby declare that:

My residence, post office address and citizenship is as stated below next to my name;

I believe that I am the original, first and sole inventor (if only one name is listed below) or an original, first and joint inventor (if plural names are listed below) of the subject matter which is claimed and for which a patent is sought on the invention entitled:

METHOD AND DEVICE FOR MONITORING AND ANALYZING SIGNALS

the specification of which: ☐ is attached hereto.
☒ was filed on: September 7, 2000
as Application No.: 09/657,181
and was amended on _____ (if applicable).

I have reviewed and understand the contents of the above-identified specification, including the claims, as amended by any amendment referred to above. I acknowledge the duty to disclose information which is material to patentability as defined in 37 C.F.R. § 1.56.

Prior Foreign Application(s)

I hereby claim foreign priority benefits under Title 35, United States Code, § 119(a)-(d) or § 365(b) of any foreign application(s) for patent or inventor's certificate, or § 365(a) of any PCT international application which designated at least one country other than the United States of America, listed below and have also identified below any foreign application(s) for patent or inventor's certificate having a filing date before that of the application on which priority is claimed:

Country	Application Number	Date of Filing (day, month, year)	Date of Issue (day, month, year)	Priority Claimed	
				Yes <input type="checkbox"/>	No <input type="checkbox"/>
				Yes <input type="checkbox"/>	No <input type="checkbox"/>
				Yes <input type="checkbox"/>	No <input type="checkbox"/>

Prior Provisional Application(s)

I hereby claim the benefit under Title 35, United States Code § 119(e) of any United States provisional application(s) listed below:

Application Number	Date of Filing (day, month, year)

Prior United States Application(s)

I hereby claim the benefit under Title 35, United States Code, § 120 of any United States application(s), or § 365(c) of any PCT international application designating the United States of America, listed below and, insofar as the subject matter of each of the claims of this application is not disclosed in the prior United States application in the manner provided by the first paragraph of Title 35, United States Code, § 112, I acknowledge the duty to disclose material information as defined in Title 37, Code of Federal Regulations, § 1.56(a) which occurred between the filing date of the prior application and the national or PCT international filing date of this application:

Application Number	Date of Filing (day, month, year)	Status - Patented, Pending, Abandoned

And I hereby appoint, both jointly and severally, as my attorneys with full power of substitution and revocation, to prosecute this application and to transact all business in the Patent and Trademark Office connected herewith the following attorneys, their registration numbers being listed after their names:

Rodger L. Tate, Registration No. 27,399; Anthony W. Shaw, Registration No. 30,104; James Remenick, Registration No. 36,902; Michael J. Songer, Reg. No. 39,841; Cono A. Carrano, Registration No. 39,623; Laurence H. Posorske, Registration No. 34,698; Floyd B. Chapman, Registration No. 40,555; David J. Kulik, Registration No. 36,576; Robert A. King, Registration No. 42,738; and Trevor Q. Coddington, Registration No. 46,633.

All correspondence and telephone communications should be addressed to: Intellectual Property Department; Brobeck, Phleger & Harrison LLP; 1333 H Street, N.W.; Suite 800; Washington, DC 20005, telephone number (202) 220-6000; facsimile number (202) 220-5200, which is also the address, telephone and facsimile numbers of each of the above listed attorneys.

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine and imprisonment, or both, under 18 U.S.C. § 1001, and that such willful false statements may jeopardize the validity of the application or any patent issuing thereon.

ASSIGNMENT

WHEREAS, WE, Scott A. Moskowitz, residing at 16711 Collins Avenue, #2505, Miami, Florida, 33160, USA, and Michael W. Berry, 12401 Princess Jeanne, Albuquerque, New Mexico, 87112, USA, have invented certain new and useful improvements in and to the subject matter of:

METHOD AND DEVICE FOR MONITORING AND ANALYZING SIGNALS

described in an application for United States Letters Patent filed on September 7, 2000, and accorded Application No. 09/657,181;

AND, WHEREAS, Blue Spike, Inc., a corporation organized under the laws of the State of Florida, having a place of business located at 16711 Collins Avenue, #2505, Miami, Florida, 33160, USA (hereinafter "ASSIGNEE"), is desirous of acquiring certain rights to the improvements and under the application;

NOW, THEREFORE, in consideration of the sum of One Dollar (\$1.00) or the equivalent thereof, and other good and valuable consideration, receipt of which is hereby acknowledged, we do hereby sell, assign and transfer unto said ASSIGNEE, its successors, assigns and legal representatives, our entire right, title and interest in and throughout the United States of America (including its territories and dependencies) and all countries foreign thereto in and to said improvements, said United States application, any other United States applications, including provisional, divisional, renewal, substitute, continuation, reexamination and reissue applications, based in whole or in part on said United States application or in whole or in part on said improvements, any foreign applications, including international and regional applications, based in whole or in part on any of the aforesaid United States applications or in whole or in part on said improvements, and in and to any and all letters patent, including extensions thereof, of any country which have been or may be granted on any of the aforesaid applications or on said improvements or any parts thereof;

AND WE hereby authorize and request our attorneys, Brobeck, Phleger & Harrison LLP, whose address is 1333 H Street, N.W., Suite 800, Washington, DC 20005, to insert hereon any identification necessary or desirable for recordation of this document, including the filing date and application number of said application when known.

AND WE hereby agree for ourselves and our heirs, executors and administrators to execute without further consideration any further documents and instruments which may be necessary, lawful and proper in the prosecution of said above-referenced application or in the preparation or prosecution of any continuing, substitute, divisional, renewal, reexamination or reissue application or in any amendments, extensions or interference proceedings, or other applications for patents of any region or country, that may be necessary to secure to ASSIGNEE its interest and title in and to said improvements or any parts thereof, and in and to said several patents or any of them;

AND WE hereby covenant for ourselves and our legal representatives, and agree with said ASSIGNEE, its successors and assigns, that we have granted no right or license to make, use, sell or offer to sell said improvements, to anyone except said ASSIGNEE, that prior to the execution of this deed, our right, title and interest in said improvements had not been

otherwise encumbered, and that we have not and will not execute any instrument in conflict therewith;

AND WE do hereby authorize and request the United States Commissioner for Patents to issue any and all letters patent which may be granted upon said United States applications, or upon said improvements or any parts thereof when granted, to said ASSIGNEE.

IN WITNESS WHEREOF, we have hereunto set our hands and seals.
